

# PSYCHOLOGY LAB

To measure the fundamental psychological traits like IQ, personality, aptitude, interest, creativity, achievement, and adjustment, among others, the institution has a well-furnished, well-equipped, and well-organized psychology lab that includes all the standard verbal, nonverbal, and performance psychological tests. As a result, the lab provides students with opportunity to get instruction in measuring and testing. This aids in their understanding of student psychology and allows teachers to adjust instructional tactics to meet learning goals.
